

Increase spacing
between top of photo
and welcome

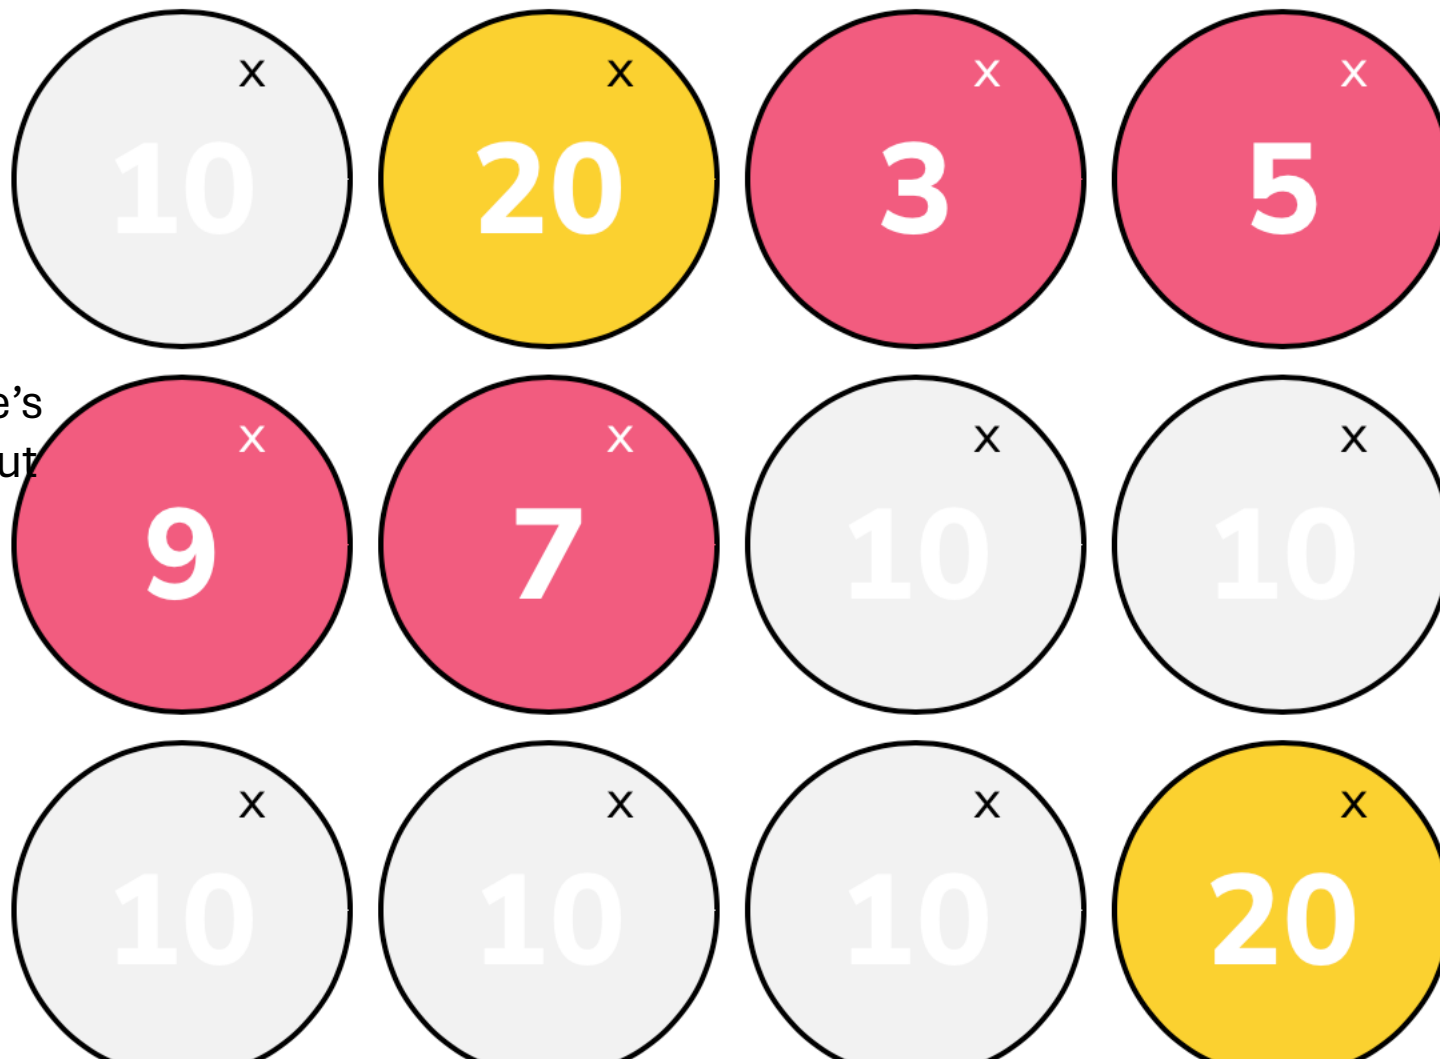

Welcome back,
 **Asparagus** 🖐️

Start scanning your points cards...

A horizontal rectangular box with a blue border, intended for scanning points cards.

Change border colour to
black and reduce
thickness by 50%

Same on all scanning
boxes across all pages

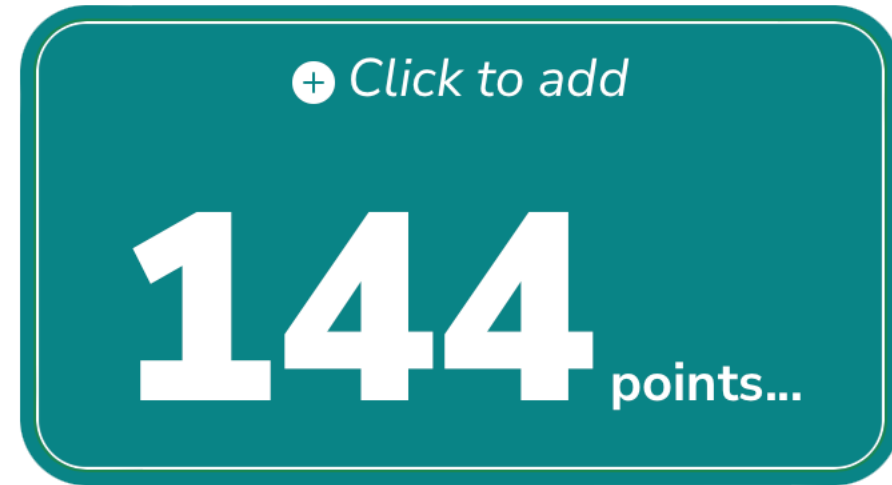

Is it possible to reduce coin size tiny bit, so line's of three fit neatly without scrolling?

Or increas

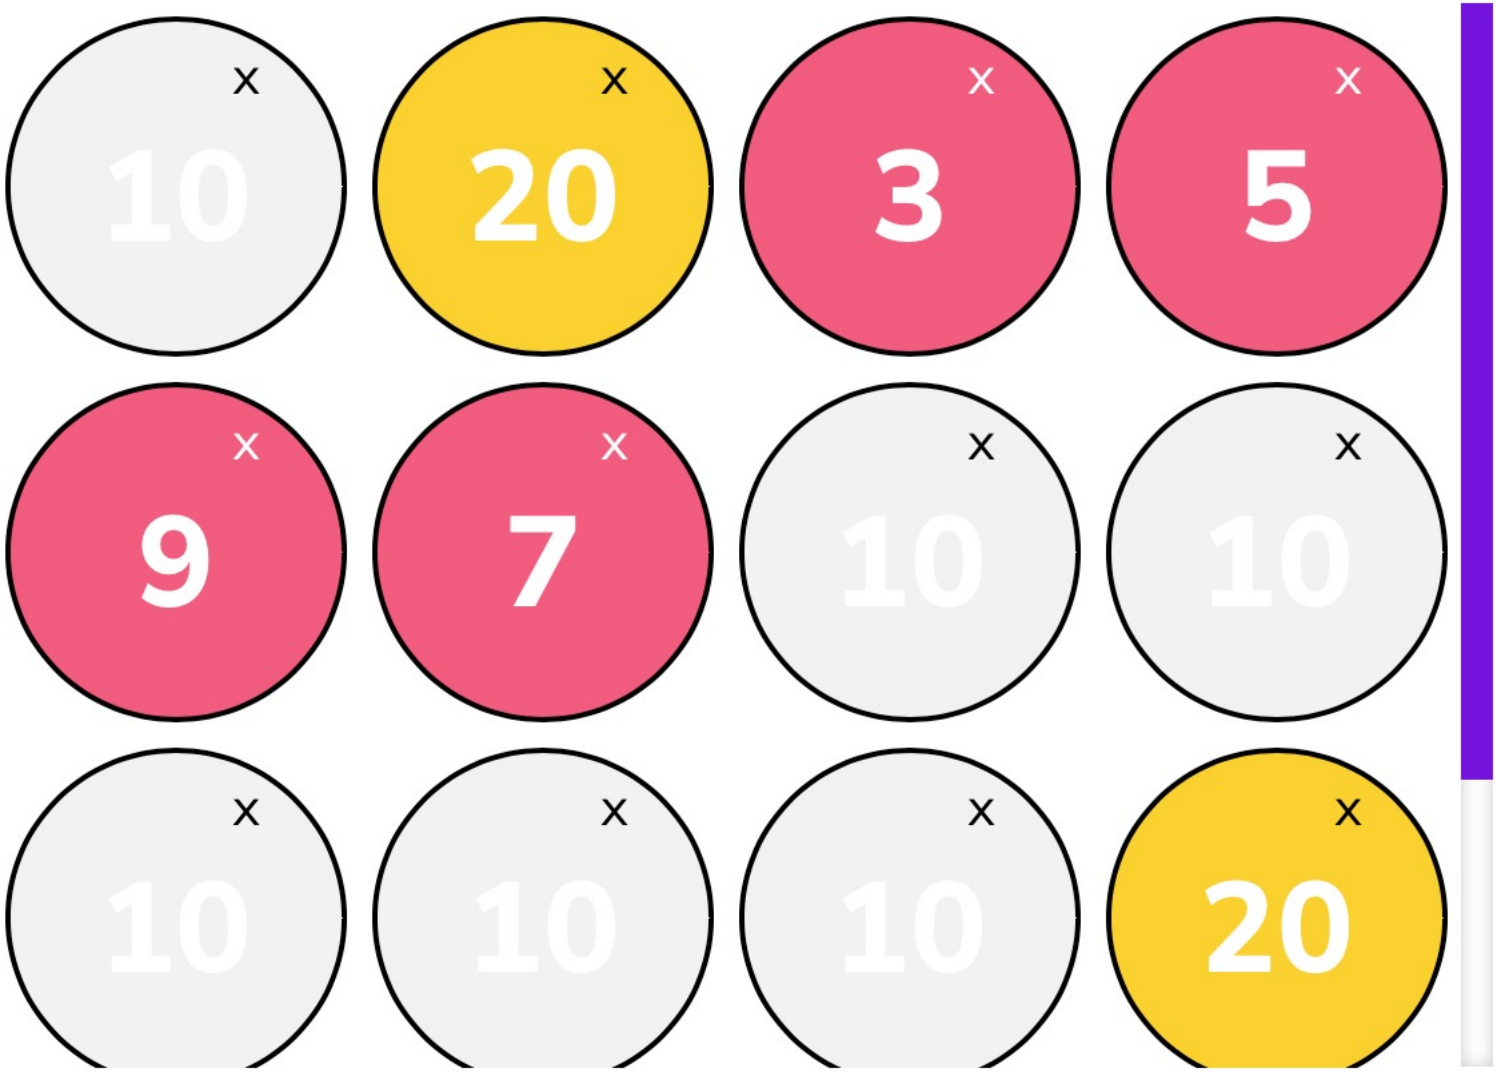

Increase green box size
to full width of token box
area – sorry!

Increase plus icon and
Click to Add text size

Don't know if it's possible
to get it to flash when
points have been
scanned but not clicked
to add? From that colour
to slightly darker version.
No worries if not.

Make 10 text black

If I attempt to use points token again for same person/same session, nothing happens.

Is it possible to get pop up box saying that's already been scanned or something?

Nice one, Asparagus👍

You've just added some more points to your score.

Head back out there and get some more points...

Next member

Can we had the + icon and “points text” to this icon too please. Same as coins page. With border too.

Increase box size and text for “Next member”. Change to ”Next person...”

Can it default to main wristband screen after 5 seconds?

Photos also being stretched

Large points means the box is expanding off the screen. Not sure how we fix this?

Maybe put the plus icon above, and so points score can expand a bit more on next line?

You can drop Recent point scorers if that's easier?

Change background colours to:

Recent point scorers...

Glaucous Jet
Explorers

+

10

points...

Asparagus Royal
Cubs

Use these colours in tag on members page please too

Add white border round pictures – like coins page

Not sure what the difference is, but this is what I get when I type in in wristband that can't be found.

Can it just say something like:

Oops, we can't find your profile – please speak to a District Camp Leader

Could not find the requested resource ✕

Could not translate Member Code
'moo3c001' ✕

Can we increase this text box/font size a bit so it's more obvious? Make it central in the screen?

Can we take out the coin code, and re-word to:

This points token has already been used by XXX.

Please hand it to a District Camp Leader

Make section tag, line up
with top of other user text

Swap Section and Total
points colums around

| NAME | GROUP | TOTAL POINTS <input type="checkbox"/> | SECTION | WRIST CODE | EDIT PHOTO |

Central text

Hi **Asparagus** 🙌

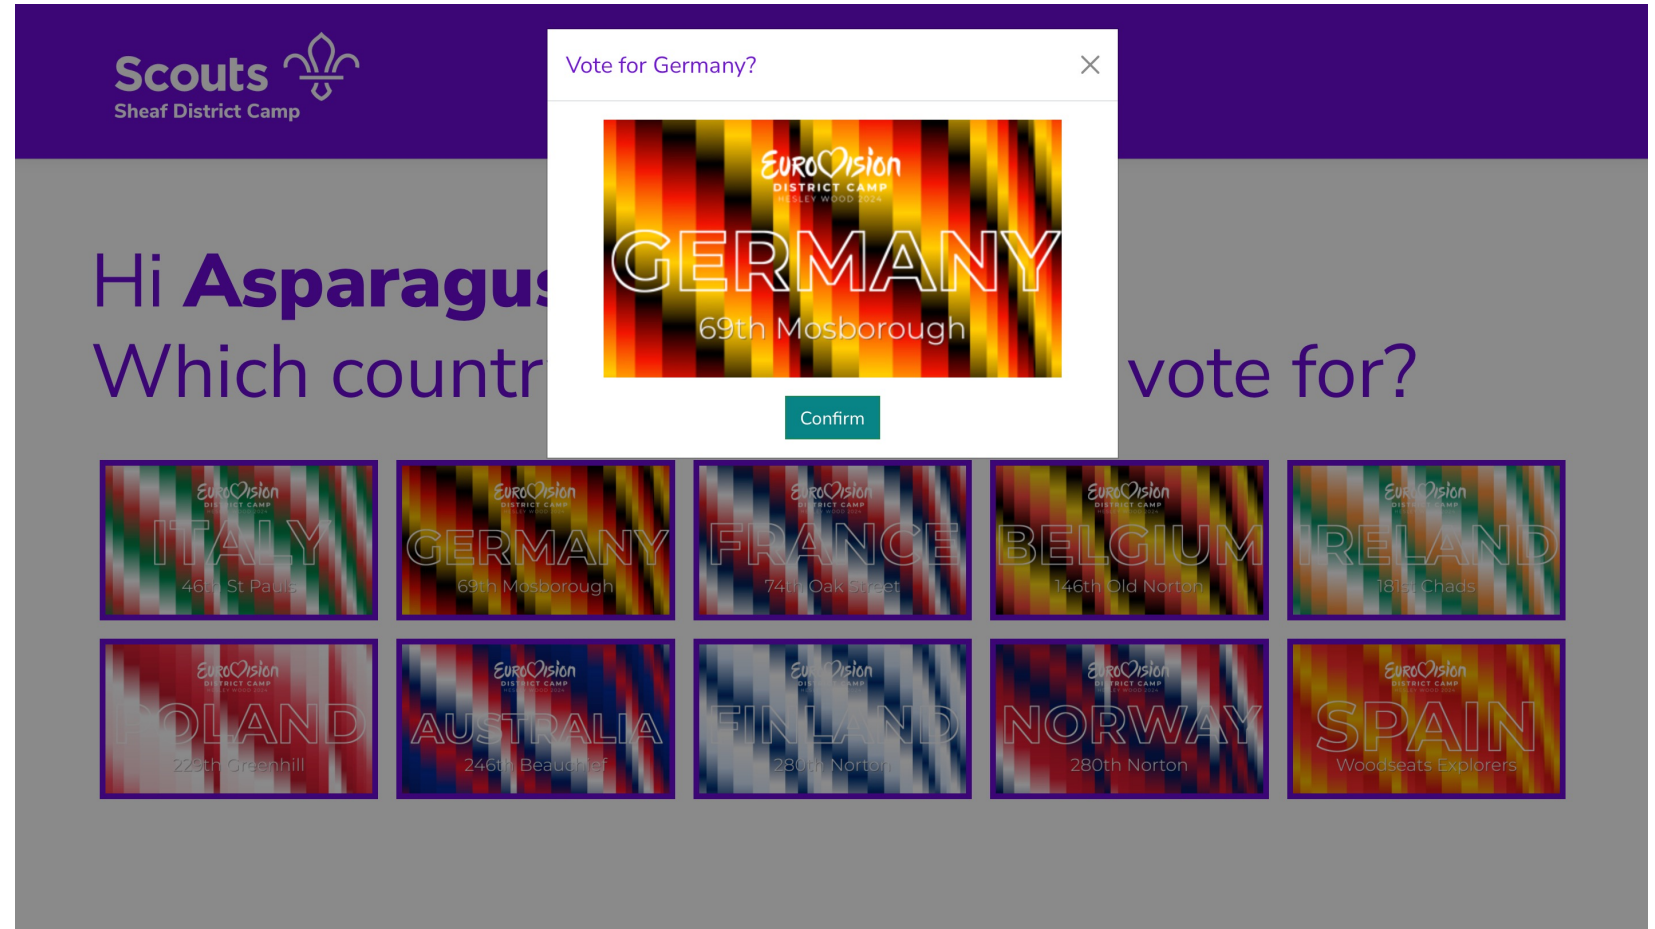

Which country do you want to vote for?

Pop up box in the centre of the screen, vertical wise too?

Increase the green
Confirm box to full width of flag, double the height of the box.

White tick icon at left, and saying “ Yes, I want to vote for XXX”

Yes, I want to vote for Germany

When confirm vote, change audio to Vote_Success.mp3 (in teams)

Thanks for voting **Asparagus**👍

You've voted for Germany!

Next member

Change top line to “Thanks, XXX – you’ve voted for xxx”

Remove second line

Increase button size/font. Auto reload to voting page
after two seconds
